BETTER

MORE

* Obviously we can't fly. This is how we feel when we've rocked a deployment - you can too!

SOFTWARE SUPERHERO STATUS?

WE BELIEVE SOFTWARE DRIVES BUSINESS

And developers drive the code which runs software. Software which changes the world around us and the environment we interact with for the better.

SO..WE ARE *SOFTWARE* SUPERHEROS & YOU CAN BECOME ONE TOO

by accelerating your development, and delivering more functionality with better results, faster - **you can become a software superhero too.**

We're here to help businesses grow and increase their bottom line by saving them time, money, and resources with software development and modernization tools, custom technology solutions, and consulting services.

We have found that there is much more to software development than the bits and the bytes. It's about the **Business** that invests in it, the **People** that use it, and the **Team** that delivers it. It is about the speed and quality of delivery. The results are what matter the most. That is what we focus on.

For us, software development is about creating software users love and providing tools for others to do the same.

ACCELERATOR

DEVELOPMENT SOLUTIONS

Develop Faster / Develop Better / Develop More

Accelerator is a comprehensive end-to-end software development solution that drives faster development with better quality & more functionality to deliver software that people *love!* You can automate and accelerate your **Mobile**, **Web** and **Windows** software development.

Surround is home to some extraordinary developers who are often revered as **superheroes** by our customers. We, unfortunately, do not actually possess super-powers. To achieve our vision we needed to innovate. To create tools to accelerate our and our customer's development. And, by accelerate, we mean much more than just doing it faster. We needed to deliver **better** results and **more** functionality. Ultimately, we wanted it all, so we had to create tools to help us work **smarter!**

That's why we built **Accelerator**. It enables and supports Surround's Accelerator Software Development strategies and helps us reach those goals by focusing on 4 major solution areas: *Accelerator's Core Architecture and Software*, the essential part of your software that defines how it will operate and perform.

Development Accelerators, which help generate complete systems or individual applications in minutes, not months. Accelerator provides best-of breed *Rapid Application Development* through advanced automation techniques used within an agile process. And, lastly, the *Accelerator Server* which ties everything all together for the end solution.

Visit: surroundtech.com/accelerate for details and videos to help you learn more about our Accelerator product and see what amazing, well architected and designed software you can produce incredibly fast!

Turn Key Solutions

We'll do the hard work and hand you the keys to a finished quality product.

On-Demand Mentoring & Development

We're there to help and instruct you when you need it, where you need it.

Managed Application Services

No Worries - We've got it all covered.

Software Modernization & Transformation

Surround Technologies revolutionizes the way you can modernize, transform, and replace your legacy systems and the speed in which you can do it. Reuse legacy interfaces, programs, and data that's still useful, build new functionality your business needs, and evolve your applications continuously.

Increase Your Responsiveness

Reduce Your Technical Debt

Eliminate Risk and Lock-Ins

Surround's Modernization Solutions Include:

- IBM i (AS/400, iSeries, System i) Modernization
- IBM z Systems Modernization
- Windows Application Modernization
- Web Application Modernization
- Database Modernization
- Automated Modernization
- Tool-assisted re-architecting/rewrite
- Business Rules Extraction

Responsive to any device

Your users want a responsive application that gives them the ability to achieve their objectives quickly and effortlessly from any device. They are looking for an experience so engaging, intuitive, and effective that the tool itself becomes invisible. Just a natural part of their day-to-day functions. For the business, there is lasting daily ROI found in optimizing this experience and, **at Surround Technologies, we are driven to build the most efficient, mission-driven, and objective-focused Windows, Web, and Mobile Applications possible to produce truly superlative solutions.**

Strategy & Discovery

Understand where you are and where you *need to be*

Gain insight into your application portfolio and map a clear direction for your future business needs.

Surround Technologies has been helping companies better understand where they are and how to get to where they need to be with well defined plans that incorporate both tactical needs and long term strategic goals and can be executed in a cost and time frame appropriate for the business. These plans are based on an agile phased approach to development and delivery so that they can be easily adapted as business needs and technologies change.

Plan the work,
work the plan.

Plan the work, work the plan, measure the progress, assess the process, and modify where needed. *That's a plan for success.*

Application Development and Modernization can be hard and complex work and often difficult to align with business goals and objectives. Especially when technologies as well as your goals and objectives are constantly changing. Our consultants are here to guide you every step of the way, anytime you need it to guide you successfully to your goal.

Training & Education

Spark a new fire of creativity in your organization – train your team in new skills. Being aware of and fully competent in all the features and capabilities of ever-evolving technologies allows developers to see new opportunities to apply them. New ideas then just seem to sprout up everywhere, and business challenges get met with inventive solutions. Besides starting a landslide of innovation in your organization, you'll be making an investment in your staff. Giving them new skill sets engages them in a fresh way. It shows you value them and may be the best way to retain them, too.

Public & On-site Courses

We offer public courses at our Surround Offices that are open to anyone. Having your staff away from the office can put a full focus on learning.

We can also conduct our courses at your company's facility or a location of your choice. We can customize our courses to meet the unique needs of your organization. Your staff will learn in the comfort and convenience of their own environment. This can sometimes minimize interruptions to your daily business operations.

Mentoring

Your education does not have to end when you leave the classroom. Utilize Surround's experienced consultants to help apply what is learned in class. By working side-by-side with your staff on your project, we can provide skills transfer, answer any questions, and help apply what was learned in class to your unique situation.

Developing Smarter

We've learned from experience, so customers can benefit from proven processes

Developing Smarter doesn't just happen.

It took years of experience working hand-in-hand with clients and users to create a process which delivered success time and time again. Visit surroundtech.com/smarter or scan the QR Code to learn more about how the processes below translated to real-world ROI.

Business Led Development and a Culture of Productivity

We look at the interests of the Business, the Users, and the Development Team to birth the right plan from the start. All the while instilling a Culture of Productivity where the results matter.

Productive User Experience (UX)

Pull back the covers on how important the subtleties of the user interface and interaction are to real productivity. Usability is a relatively young science and we've studied it deeply.

Accelerated Software Development

Our overarching strategy for developing better software, faster. Speed is key to developer productivity, and it can be found without sacrificing user productivity or architectural elegance and flexibility. It's like having super powers.

Software Design and Architecture

Great architecture allows you to quickly adapt your software to changing business needs while minimizing any technical debt, significantly reducing current and future efforts and costs.

Modern Approach to Application Modernization

An evolutionary process that adapts legacy systems at your pace. It addresses immediate tactical needs as well as strategic long-term goals through low-risk, agile, incremental releases.

Development Efficiency

Gain insight into how you can get the job done fast with the best results possible because speed is great, but Results are what matter. Don't worry, we show you how to get both.

Reviews are everything

Read what customers are saying about Accelerator

Do you buy something without checking the reviews first? We don't either.

Don't just take our word for it - Read reviews from customers who've experienced what Accelerator has done for them already. Visit surroundtech.com/portfolio to see case studies about our customers and learn about their projects, from concept to completion.
